Re: Lot 45, Block 3, QV#2

To The Board of Health:

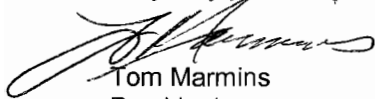

The North Star Owners Association recently received a letter from the Summit County Environmental Health Department. The letter advised the Board of the Owners Association that the owners of a house being completed at 82 Kimmes Lane, Jason Rodgers and James Hazel, had submitted a request for a temporary variance to allow for county requested changes to their septic system to be made after spring thaw.

It is my understanding that the extent of the changes are to be determined after the thaw. In any case it was my intention to attend the meeting to voice the Board/Owner Association support of the temporary variance request.

Unfortunately business requirements will not permit me the time to attend the meeting next Tuesday. This letter is therefore intended to express the OA's support of the temporary variance request.

We hope that this letter will help expedite the approval and issuance of the CO for this residence.

Very truly yours,

Tom Marmins
President
North Star Owners Association
